

Drew Redford

Ontario, Canada | drew@drewredford.com

SUMMARY

Highly motivated and results-oriented software professional with a proven track record in full-stack development, technical leadership, and process optimization. Adept at transforming support operations, enhancing team efficiency, and delivering impactful technical solutions for complex business challenges. Seeking to leverage advanced development, and a problem-solving mindset to drive significant value in a challenging role.

SKILLS

- **Programming & Scripting:** PHP, Laravel, Vue, Zoho Deluge, JavaScript, Python, Java, .NET, C#
- **Web Technologies:** HTML, CSS, Bootstrap
- **Database:** SQL (Zoho proprietary SQL, complex querying)
- **APIs & Integrations:** REST API (Zoho, Zoom, FreshByte, Slybroadcast, Custom APIs etc)
- **Cloud Platforms:** AWS Fargate, Docker
- **Soft Skills:** Leadership, Team Management, Mentoring, Process Improvement, Problem Solving, Client Relationship Management, Solution Architecture, Adaptability, Communication

EXPERIENCE

Vehikl | Waterloo

Software Developer | June 2026 – Present

- Develop and maintain features for client web applications in Laravel and PHP, working within an established codebase and delivery process from ticket through to production.
- Practice test-driven development and daily pairing/mobbing alongside senior developers, writing tests ahead of implementation and participating in code review to meet the team's clean-code standards.
- Embed with the client's engineering team as an extension of their staff, joining planning and standups to scope requirements into deliverable technical work.

Hero Technical Solutions | Remote

Senior Developer & Customer Support Lead | September 2023 – June 2026

Developer | 2022 – September 2023

Co-op Student | 2022

- Promoted to Senior Developer and Customer Support Lead, leading a ten person team and overseeing critical support operations for diverse clients.
- Transformed support ticket management, significantly reducing reply times and improving SLA adherence by implementing proactive monitoring and developer accountability measures.
- Successfully reduced the backlog of open tickets, improving overall client satisfaction and operational efficiency.
- Mentored and guided new co-op students from onboarding to independent task completion, resulting in one student winning the Provincial Co-op Student of the Year award. Provided focused troubleshooting assistance and code review for junior developers.
- Spearheaded development initiatives using Zoho's Deluge, Javascript/HTML/CSS and Python to create and enhance custom applications.
- Led client meetings to gather requirements, scope solutions, and present technical implementations, significantly improving user experience and reporting capabilities.
- Implemented numerous integrations between Zoho and third-party systems (e.g., invoicing, quoting, project stages, meetings, data collection), streamlining critical business processes.

PROJECTS

- **Custom Speed-Dating Algorithm Development:** Designed and implemented a complex Python-based algorithm for a client's multi-industry "speed dating" platform. Solution dynamically prioritized company rankings, prevented duplicate meetings, allowed for variable table allocations, and optimized meeting scheduling within tight timeframes.
- **Machine Learning (ML) Margin Optimization & Cloud Deployment:** Developed a Neural Network component for a client's ML project aimed at optimizing project margins by predicting win probabilities. Deployed the solution on AWS Fargate.
- **Third-Party API Integration & Solution Design:** Consistently delivered solutions involving poorly documented and unique third-party APIs (e.g., Hivebrite, JobTread, Zoom), often requiring independent problem-solving and custom solution design to achieve client requirements.

OTHER EXPERIENCE

Maple Leaf Sports & Entertainment | Toronto, ON

Technician | 2019 – 2020

Internship | 2018

- Managed the setup, strike (take down), maintenance, and repair of in-house presentation equipment for major sporting events (Raptors, Leafs, Rock) and concerts.
- Gained hands-on experience with venue technology, including EVS machines for live sports broadcasts.

Freelance | Ontario

Various Roles (Utility, Camera Work, Junior Tech, Switcher Operator) | 2018 – 2020

- Contributed to various productions, including live events, television broadcasts, and concerts, demonstrating adaptability and diverse technical skills.

EDUCATION

Mohawk College | Hamilton, ON

Computer Systems Technician, Software Support | 2021 – 2023

Mohawk College | Hamilton, ON

Broadcasting, Television and Communications Media, Diploma | 2016 – 2019
